

In a continued effort to bring the most advanced technology to our patients, we are proud to announce the inclusion of the Eidon Retinal Imaging and the Optovue Wellness Exam as an integral part of your exam today.

Our doctors are concerned about the health of your eyes including retinal problems such as macular degeneration, retinal holes or tears, retinal detachment, and glaucoma as well as systemic diseases such as diabetes and high blood pressure. These conditions can lead to serious ocular or health problems, including partial loss of vision or blindness, and can often develop without warning or symptoms.

The Eidon Retinal Imaging benefits include:

- Provides a high resolution, detailed image of the surface of the retina that Dr. Klein will use to better discuss your examination today
- Provides a digital image that is a permanent record in your medical file which gives Dr. Klein a year to year comparison for tracking and diagnosing potential eye disease.
- The imaging procedure is quick and may not require dilation.

The Optovue wellness exam benefits include:

- Provides a scan that will look beneath the surface of the retina to detect any conditions that may not be visible on the surface of the retina.
- Detects vision threatening diseases in the early stages, when they are most treatable.
- The scan is a quick, non-invasive, and does not require dilation

Dr Klein highly recommends that **ALL** patients have the Eidon Retinal Imaging and the Optovue Wellness Exam performed annually. Dr. Klein also recommends that each patient be dilated at least once a year to provide the most thorough eye health examination. While the Eidon Retinal Imaging can be done undilated (in most cases), it is still recommended to do the imaging through a dilated pupil.

Insurance typically does not cover any advanced screening technology beyond the general eye examination. Therefore, this will be done as an enhancement to the general eye exam for a fee of \$40 for the Eidon and \$29 for the Optovue Wellness Exam. You may do both tests together for a fee of \$54.

_____ I do not want to be dilated today but elect to have the Eidon Retinal Imaging. I understand there is a \$40 out of pocket charge due at the time of service.

_____ I do not want to be dilated today but elect to have the Optovue Wellness Exam. I understand that there is a \$29 out of pocket charge due at the time of service.

_____ I want to be dilated and have NO additional testing done.

_____ I elect to have both the Eidon Retinal Imaging and the Optovue Wellness Exam. I understand there is a \$54 out of pocket charge due at time of service. **Bundled fee not available with insurance.**
